LRK G304

F₁ Melon Hybrid

TECHNICAL DATA

Description: This variety has fine netting, is round to oval in shape, and has no sutures. Exterior coloring is orange, while the interior is orange to pink in color. This melon is very sweet. Average size is 1 to 1.8 kilograms.

Maturity: Approximately 100-105 days

Disease Powdery Mildew 1, Fusarium Wilt (race 0,1,2)

FEATURES

This hybrid Ananas variety is popular in Middle Eastern countries. Aside from color and added resistances this variety is very similar to the standard Ananas hybrid.

Disclaimer: All variety information is based on field and laboratory observations. Data presented is believed to be accurate at the time this information sheet was prepared. However, accuracy of these results, when grown in any other time period, location, weather conditions or cultural systems may vary substantially and is, therefore, not guaranteed.

F₁ Melon Hybrid

TECHNICAL DATA

Description: This is a Tania type melon hybrid. This variety has an oval shape, with fine netting, and no sutures. Exterior coloring is tan, while the interior is a bright orange. It has a really good flavor, and is quite sweet 13 % Brix. Average size is 6.5 inches by 6 inches. Average weight of the melon is 4 pounds.

Maturity: Approximately 90 days

Disease: Powdery Mildew 1, Fusarium Wilt (race 0,1,2)

FEATURES

This variety has a very vigorous vine. It also is an excellent shipper. This hybrid is popular in Southern Europe. i.e. Greece, Turkey, Iran, & M.E. This variety is suitable for outdoor production. This is an improved Tania type variety, and firmer than the original.
